

Lightwave 3D

PRODUCT DESCRIPTION / SYSTEM REQUIREMENTS / PRICING

PRODUCT DESCRIPTION

LightWave 3D is the perfect combination of power, speed and value. Easy to learn and use and versatile enough for any application. **LightWave is a complete modelling, rendering and animation system** used extensively in broadcast television production, film visual effects, video game development, print graphics and visualization. LightWave offers extensive platform support including, Windows 32-bit, Windows 64-bit and Mac. LightWave also offers full support of systems with multi-core processors. In addition to LightWave's highly regarded photo-real render engine each license comes with 999 free render nodes, making it the most affordable, efficient render pipeline option on the market.
